### **THE LINING-OUT STOCK SITUATION**

We are now entering that period predicted and dreaded, by the lining out stock grower. Due to labor shortages and some adverse weather for the past three or four years, lining out stock is really short, and getting more scarce every day. Also because seed was impossible to secure from Europe, varieties grown from imported seed are practically impossible to obtain, except in a few remaining transplant grades. Prices are higher than last year, but will go still higher before spring, and many grades and varieties impossible to obtain by spring. Better cover your needs as quickly as possible.

## A FEW OF OUR 3YR. SEEDLINGS

### Abies balsamea (Balsam Fir)

Balsam Fir as a mature ornamental isn't worth a "hoot", but until it reaches a height of about 20 ft. it is a beautiful tree. However its real value is in growing it for Xmas trees because of its fir fragrance and its needle holding characteristics.

MUGHO

PINE

Here is a real war casualty. Previous to the war practically all the Mugho Pine seed came from central Europe especially the Balkan countries.

Not even a few dribbles have entered this country since the war, as far as we know. Furthermore, no domestic seed is available in this country except Montana Mugho, which of course is not a dwarf type. You will note we no longer have seedlings available, nor do we believe anyone else in the country has any of the true dwarf imported type. We were fortunate in having a good supply of seed when the war began, so right now we can supply transplants, but after they are gone, there will be many years when Mugho Pine liners will be scarce, for it takes at least 4 years to grow a small 2-4 in. transplant after the seed is again available. Buying some of these Mugho Pine liners now, is one thing on which you can not go wrong.

Also known as Ostrich Plume fern. One of the best of the hardy ferns. Grows to a height of from two to four feet every year dying back to the root every fall after a hard frost. Ideal for shady spots and seclud-

ed nooks. Our roots are all No. 1 grade, - large and husky. We have these in storage and they can be shipped any time during the winter. Make an excellent over the counter winter item to sell, as many people pot them and plant inside.
